Applications now open for APP Fellowship

The Betty Irene Moore School of Nursing at UC Davis seeks highly motivated master's-degree or doctorally prepared early-career, advanced practice providers to serve in a unique role that integrates a transition-to-practice clinical experience with clinical teaching activities in a structured, guided learning environment.

The Advanced Practice Providers (APP) Fellowship includes eight full-time, 12-month positions at UC Davis Health, which is located on a modern, 140-acre campus in Sacramento, California. The Sacramento campus is home to the School of Nursing, School of Medicine, UC Davis Medical Center (including a level-I trauma center and burn unit, and a full range of outpatient services), a fully accredited children's hospital, and an NCI-designated comprehensive cancer center.

The APP Fellowship includes one position in each of these specialties: trauma surgery, radiology, burn surgery, endocrinology, oncology, neurology, neurosurgery and orthopaedics.

Apply by Aug. 1 for the 2023-24 fellowship.

For eligibility and application details, visit the website at health.ucdavis.edu/nurse/advancedpractice/ap_fellowship.html
