Pathology and Laboratory Medicine

Presents,
“Cascading Chaos: New Insights Into the
Pathophysiology and Complications of Sickle Cell Disease”

Objectives:
1. Describe the role of hemolysis in the vascular complications associated with sickle cell disease
2. Discuss the role of leukocytes in acute vaso-occlusive events.
3. Recognize that venous thromboembolic events are an underappreciated complication of sickle cell disease.
4. Summarize examples current clinical trials for sickle cell disease.
